

Safety straps included

PILOT

PLATFORM TRUNK-TYPE BIKE CARRIER FOR REAR DOOR MOUNTING

The Pilot is a mix of trunk rack and platform style carrier. The bike carrier attaches to your vehicle using 6 straps, each with a rubber coated hook. They hook over the top, sides and bottom of the boot/rear door. The bikes are installed on the wheel supports and fixed using locking clamps.

- Carries up to 2 bikes (Max 2 x 15 = 30kg)
- The carrier is supplied almost fully assembled; minimum work is required.
- The carrier is easy and quick to install using the hub adjustment system made of glass reinforced nylon.
- The wheel holders can have their position adjusted and will accommodate all wheelbases, even very small children's bikes if you turn them through 180°.
- The wheel holders fixed position keep the bikes away from each other
- The wheel holders include tough and easily adjusted wheel straps in ratchet system which are long enough to hold the biggest rims.
- Fits most sedan and hatchback vehicles.
- attachment straps with zinc casted cam buckles .
- Shock absorber system to safely hold rack and prevent damages to car and bikes.
- High durability and density supporting foams protect your vehicle's finish.
- The bikes are attached using locking clamps. Extra protection to the bike frame is given by rubber the integrated rubber pads.
- The build quality - tube bending, rust proofing, painting, component quality, is exemplary.
- In some cases, it might still require a lighting and number plate board.

Technical specifications

- Dimensions: 102 x 51 x 20 cm
- Weight: 9.2kg

Please note that you cannot use rear fixing carriers on cars with rear spoilers, non-metallic edges at the top of the hatch door or on vehicles where modifications to the roof or tailgate would have an effect on the fitting of the carrier.
